GBADAMOSI MUBARAQ

bidmusmubaraq0000@gmail.com | +234 815 367 2551

Lagos, Nigeria

Professional Summary

Results-driven **.NET Developer** with proven experience designing and delivering scalable backend systems and APIs using **C#, ASP.NET Core, and SQL Server**. Skilled in object-oriented programming, RESTful API design, multi-tenant architecture, and enterprise software development. Track record of leading full-stack modernisation projects by migrating legacy desktop systems to modern web platforms and delivering production-grade solutions across agile and freelance environments.

Professional Experience

Head of Software – SoftHarbor
2026 – Present

- Led architecture and end-to-end development of GlobalSuite, a multi-tenant ERP platform spanning 24 system modules and over 395 database tables using C# (.NET) with a 3-tier architecture.
- Directed the modernisation of a legacy WinForms desktop application into a web platform using ASP.NET Core (.NET 10) REST APIs and a React/TypeScript frontend.
- Designed a stored-procedure-only data access layer using Enterprise Library 6.0 and SQL Server for General Ledger, Payroll and Customer Management workflows.
- Implemented subdomain-driven multi-tenancy with JWT authentication and a two-level role-based permission system.
- Oversaw development of General Ledger, Human Resources, Customer Management, Asset Management and Capital Markets modules.
- Managed Azure staging and production deployments while coordinating engineering release cycles.

.NET Developer – Innovastra
2025 – 2026

- Develop and maintain backend services using ASP.NET Core and C#.
- Design and implement RESTful APIs using Clean Architecture and CQRS.
- Apply Mediator Pattern and Unit of Work to build maintainable systems.
- Integrate SQL Server databases using Entity Framework Core and stored procedures.
- Implement secure configuration using Azure Key Vault.
- Write unit tests and collaborate within Agile sprints using Azure DevOps.

Freelance .NET Developer – Upwork
2023 – 2025

- Built ASP.NET Core MVC applications and RESTful APIs for clients.
- Designed SQL Server schemas and stored procedures.
- Integrated backend services using Entity Framework Core.
- Performed API testing and documentation using Swagger and Postman.

Project Experience

Enterprise Backend Development

Developed layered backend systems implementing CRUD operations, validation, error handling and modular API architecture.

Microservices Development

Built microservices supporting secure file storage integrations while following Clean Architecture principles.

REST API Development

Designed and implemented scalable RESTful APIs with JWT Authentication, CQRS, Mediator Pattern and Entity Framework Core.

Education

Bachelor of Engineering, Electrical and Electronics Engineering
University of Lagos, Nigeria

Technical Skills

Languages	C#, SQL, JavaScript, TypeScript
Frameworks	.NET, ASP.NET Core, Blazor, React
Architecture & Patterns	Clean Architecture, CQRS, Mediator Pattern, Unit of Work, Multi-Tenancy
Databases	SQL Server, Entity Framework Core, Stored Procedures, Enterprise Library 6.0
Cloud & DevOps	Azure, Azure DevOps, Azure Key Vault
Testing & Tools	Unit Testing, Swagger, Postman, Git
Concepts	RESTful APIs, JWT Authentication, ERP Systems, Multithreading, Agile Development
